

Healthcare Error - Pay Check 03/11/2020

We were notified by the City that employees who made changes to their Medical Insurance during open enrollment may have gotten overcharged. They believe the issue is limited to those that changed from Domestic Partner coverage to either single or family coverage tier; those employees that moved from active coverage to waiving coverage; and employees that switched from Post-tax to Pre-tax deductions.

The City also advised us that that they need time to audit and validate records and will be unable to refund impacted employees until 03/25/21 pay period 6. Please send me an email at SWilson@CWA4502.org if you are impacted.
